

## Privacy (Reading)

### What is privacy (reading) Settings?

You can choose whether or not your site will be crawled by robots, ping services, and spiders. If you want those services to ignore your site, click the second option here. Note that your privacy is not complete; your site is still visible on the web.

The screenshot shows the WordPress 'Reading Settings' page. The left sidebar contains a menu with 'Settings' highlighted. The main content area is divided into sections: 'Front page displays', 'Blog pages show at most', 'Syndication feeds show the most recent', and 'Site Visibility'. Three red arrows point to specific elements: one to the 'Settings' menu item, one to the 'Public - Discourage search engines from indexing this site' radio button, and one to the 'Save Changes' button. Three white boxes with black text provide instructions: '1. Click "Settings" and Reading', '2. Click if you want to restricts search engines from including your site', and '3. Click "Save Changes"'. The 'Site Visibility' section has the first radio button selected.

### Further Support
